PRESENTATION OBJECTIVE

Students face challenges during interviews:

- ★ Lack of confidence and poor eye contact
- ★ Incorrect posture and excessive head movement
- ★ Speaking too fast or too slow
- ★ No real time objective feedback to improve
- ★ Using excessive filler words like "Umm", "Like"

THE AURA SOLUTION

Aura Coach analyzes communication using AI in real-time.

01 Posture + Head tilt detection

02 Facial emotion tracking

03 Voice analysis (pace, volume, tone, pitch)

04 Automatic performance report + improvement tips

05 Practice → Analyze → Improve

HOW IT WORKS

01

Camera → Pose AI
(Body posture +
head tilt)

02

Microphone →
Audio AI (tone,
pitch, fillers,
speaking pace)

03

AI Engine →
Generates real-
time insights +
report

04

User Dashboard →
Shows feedback
and progress

TECHNO STACK

01 Frontend : React.js, face-api.js, MediaPipe

02 Backend : FastAPI (Python), WebSockets

03 Voice Analysis : librosa, soundfile, numpy

04 ML Models : Facial expression recognition, pose estimation

05 Deployment : Locally

KEY FEATURES

01 Body Language Analysis — detects posture alignment & head tilt

02 Eye Contact Tracking — monitors focus

03 Emotion Detection — identifies mood (happy, neutral, sad)

04 Speech Analysis — tone, pitch, volume, fillers, WPM

05 Automatic Report — summary + recommendations

06 User receives measurable and actionable feedback.

USE CASES

01 Target Users

- Students preparing for placements
- Public speakers
- Professionals appearing in interviews

02 RevenueModel

- B2B licensing to colleges (₹50–₹100 per student)
- Premium personal subscription

The Shared Solution for Future Success

CHALLENGES FACED

- ★ WebSocket streaming for live audio analysis
- ★ Real-time emotion detection performance optimization
- ★ Hosting backend & frontend with AI models
- ★ We solved them using lightweight models & optimized streaming pipeline

FUTURE SCOPE

- ★ AI Interviewer — asks questions in real-time based on resume
 - ★ Contextual follow-up questions depending on answers
 - Instant scoring + personalized feedback after
 - ★ mock interview
 - Long-term progress dashboard & history
 - ★ tracking
- Goal: Create a complete end-to-end virtual interview room.
